

Date: **August, 1989**Subject: **TRANSISTOR CHANGE**Model: **APR-24/5003V**Serial No: **10,001-10,401 (APR-24)**  
**10,001-10,801 (APR-5003V)****DESCRIPTION**

The SP-7000-0127-01 transistor used in the following locations in APR-24 and APR-5003V units has been replaced with a type 2N4401 in later production units.

CNL Board: Q1 and Q8

TCC Board: Q8

MRA Board: Q4

The new part is compatible for use in all earlier units. However, the protective plastic tubing used on the former part is no longer required.

The part number has changed as follows.

<b>FORMER</b>		<b>NEW</b>
SP-7000-0127-01	→	2N4401
T-9410-286-1		T-9414-392-1
